Brunswick South Primary School – School Strategic Plan 'At a Glance'

VISION: For all students to live meaningful and rewarding lives; valuing and being valued as members of diverse communities

VALUES: Constant Learning Mutual Responsibility Compassion Sense of Possibility

	SCHOOL LEADERSHIP	TEACHING PRACTICE	STUDENT-LED LEARNING	PARTNERING WITH COMMUNITY
GOALS	Promote high quality and consistent teaching practice to optimise student learning and growth, particularly literacy and numeracy.		Foster intellectually engaged and self- aware learners.	Engage the school, families and the wider community as active participants in student learning.
KEY IMPROVEMENT STRATEGIES & ACTIONS	Bring teachers together from within and across year levels and across English and Italian programs (in Professional Learning Communities) to improve consistency and quality of teaching, student learning and assessment. Establish subject-specific groups of teachers (Foundation to Grade 6) based around literacy, numeracy, wellbeing and engagement. Evaluate the effectiveness of this approach each year. Build the capacity and confidence of all staff to lead positive changes within the school. Develop a whole-school assessment approach and schedule for monitoring student progress and tracking learning growth. Embed School Wide Positive Behaviour Support, a Department of Education framework to improve behaviour and wellbeing at school.	Work together to improve consistency in teaching approach, planning and assessment across and within year levels and across English and Italian programs. Implement evidence-based, high-impact teaching methods such as using models of best practice, coaching, and feedback. Ensure learning is visible in every classroom so teachers and students understand what they are learning, why they are learning it and what comes next. Support and enhance our bi-lingual model to deliver agreed aspects of the curriculum in Italian. Track students' individual progress. Build deep understanding of the Victorian curriculum.	Establish a student-centred approach where students (with support of teachers): Establish a growth mindset. Set own learning goals and targets, particularly in Literacy and Numeracy to understand 'what am I learning?' and 'how am I going?' Develop portfolios for self-assessment and reporting. Share learning goals and targets with families through student-led conferences. Use three-way feedback (teacher-student, student-teacher, student-student).	Use student-led conferences to guide and engage parents and carers as active participants in learning. Further strengthen transparent decision making processes that communicate a clear rationale and considers the needs of all students
